HIGH GAIN BROADBAND RF POWER AMPLIFIER

**E10090-02-05**

Rev.A

Designed for Wide-band High Power application in the V-UHF range. This amplifier utilizes class A Silicon RF Power LDMOSFET devices that provide high gain, wide dynamic range and good 3rd order intercept point. High efficiency, reliable operation and Flat gain are being achieved by employing unique broadband RF networks, custom machined housing and heavy duty components. Each unit undergoes extensive burn-in prior to final test and Q/A.
